

The TVi Color is a simple, hand-held, electronic magnifier that can be used, with your television, to enhance and magnify whatever you want to read. Its ergonomic design and easy to use optical zoom provides access to a broad range of difficult to read items. If everyday tasks such as reading information on a medicine bottle, cooking instructions or reading bills while in the home prove difficult, then the TVi Color is the solution for you.

FEATURES

Modes: Full colour, enhanced positive and negative reading modes.

Magnification: On a 14" TV, the magnification is adjustable from 9X to 18X owing to its unique optical zoom capability.

Mouse buttons: Conveniently located buttons on the mouse allow the user to control the main functions of the unit.

Overview mode: For easy orientation on a document or for looking at one's own face.
